

Welcome to INTCAS

INTCAS helps education institutions from across the world to attract, recruit and manage international students in a safe, compliant and cost-efficient way. Institutions can enter our platform and form relationships with various communities to connect with students and parents. Student application and admission data is held securely and shared privately with appropriate communities, thus increasing transparency and trust along the admission lifecycle. Our platform provides a range of products and support centres which enrich the student experience whilst mitigating marketing, financial, immigration and compliance risks.
